## Zetta Medical Technologies

### A Better Value Without Compromise

Ask Zetta Medical Technologies' customers and they'll tell you quality means satisfaction with the preowned systems they purchase from us and that they see quality in the professional installations our experienced techs perform nationwide—**the same service engineers that provide timely, dedicated equipment maintenance for you and your team.**

Zetta customers know what quality is. They see it in our work every day—**at a fraction of the cost of the OEM.** If you're interested in seeing how we can provide quality solutions for your medical imaging needs, contact us today.

## Nova Biomedical StatSensor® 2010 Product Announcement

### Whole Blood Creatinine and eGFR in 30 Seconds

StatSensor® Creatinine with eGFR provides a simple 30-second assessment of renal function by finger prick capillary blood sampling at the point of care. This lightweight, handheld analyzer can minimize the risk of CMIN prior to the use of contrast media and eliminate workflow interruptions that can cause lost productivity in the radiology suite. StatSensor Creatinine offers easy, virtually painless capillary blood sampling on small, 1.2-microliter blood samples with fast, 30-second test results and interfaces seamlessly with hospital and laboratory information systems. StatSensor Creatinine calculates eGFR by either MDRD or Cockcroft-Gault equations and rapidly assesses renal function for inpatient or outpatient testing.

For more details, please call **800-458-5813** or **781-647-3700**, e-mail [info@novabio.com](mailto:info@novabio.com), or visit [www.novabiomedical.com](http://www.novabiomedical.com).

## Clear Image Singles®

Clear Image Singles, unit-dose packets of ultrasound scanning gel, are becoming the New Standard of Care in efforts to eliminate patient cross-contamination from gel bottles. Clear Image Singles are convenient, eliminate bottle washing, reduce waste, are cost-effective, and eliminate the potential of cross-contamination from refilled gel bottles.

Over 4.2 million patients have been protected with Clear Image Singles; over 50% of the top 10 hospitals making the *U.S. News & World Report* 2008 Honor Roll use Clear Image Singles. Protect your patients today. Free samples of Clear Image Singles are available at [www.clearimagesingles.com](http://www.clearimagesingles.com) or by calling **800-458-4254**.

## Diversified Systems Optical Media Specialists

Are you a medical imaging facility using PACS Technology? If so, you can benefit from custom-printed optical media from Diversified Systems.

Our print processes are all done in-house so we can personally oversee every print job. Likewise, we use only PACS certified CD-R and DVD-R media, ensuring our users get the highest quality product available. The value provided by Diversified Systems—superior print quality and excellent media—is second to none.

Give us a call at **800-255-3142** or visit us today at [www.dsגי.com/medical](http://www.dsגי.com/medical).

## Direct Subspecialty and General Radiology Solutions

### Competitive Advantage

- Personalized full-service radiology company
- Physician owned, managed and operated
- Rigorous QA program
- Industry-leading TAT
- We are collectively licensed in all 50 states
- Extremely competitive pricing
- Top expertise (ie, training at NYU, Columbia, Mallinckrodt, Cornell, Hopkins, UCSF, UPenn, Jefferson, etc)

### Our Clients

- Imaging centers & radiology groups
- All size community based hospitals
- All size government hospitals & facilities
- Mobile units including PET, MRI and ultrasound

**Koolant Coolers** water to air-cooled chillers for outdoor installation are designed to provide stable, fully dedicated cooling for MRI systems. Developed to meet the varying heat load capacity requirements of the medical market, they maintain tight temperature tolerances while providing optimized energy usage and reliable performance for critical applications. They feature a quad compressor, dual tandem refrigerant circuits, and dual redundant fluid pumps with automatic switch-over.

**Koolant Coolers** maintains a specialized service team to respond to the critical needs of our medical clientele and is the preferred chiller provider for several major medical imaging brands.
