ALLPRO 360° CR Package for Medical Practices

ALLPRO CR Packages featuring ScanX[®] technology and PACSmart[™] Imaging Software provides the fastest, most comprehensive way to bring top quality digital radiography to your medical practice. Our integrated packages include everything you need, a high performance all-in-one solution designed for ease of operation.

Call 800-862-4050 or visit www.allproimaging.com to schedule a demonstration.

amphion
medical solutions

Triton[™] takes a major leap forward in increasing radiologist efficiency and speeding delivery of reports to referring physicians. With Triton, radiologists can dictate, review, and electronically sign reports all in one session. Providing services and technology for every size radiology group, you have the ability to customize what YOUR facility needs for:

- Transcription
- Coding
- Coder education
- Pre-bill coding review

Medical Data Migration and Storage

EXPERIENCE. TALENT. TECHNOLOGY. PROOF.

Rapid Data Migration and PACS Neutral Archiving from Laitek

McKesson's **solutions for enterprise medical imaging are built** on an architecture that ensures stability, performance and scalability of healthcare providers' mission critical infrastructure. By matching deployment models based on network characteristics, open standards and connectivity, and geographic distribution of facilities, McKesson is able to optimize the infrastructure performance scaling to specific environments while still providing a cost-effective solution—whether studies are acquired elsewhere, large and complex, retrieved from another DICOM system or other imaging department, or travel between facilities on low bandwidth networks.

Sorna provides innovations to simplify the import, export, management, and display of medical records and diagnostic images on portable media:

- Networked DISC publishing systems, powered by reliable **expedo** software, streamline the custom creation of patient records through programmed automation.
- **Reviewer** is a multifunctional software suite that imports, exports, acquires, searches for, distributes, deidentifies, reidentifies, DICOM-izes, reports about, integrates, and displays internally and externally generated DICOM and non-DICOM medical images. Every tool you need on one platform.
