MRI-Safe Tools

Imprex International provides titanium and nonferrous tool solutions for the repair and maintenance of today's MRI, NMR, and other high-Tesla environments. For over 20 years, Imprex International has worked with the top companies, medical device manufacturers, and service technicians to provide top-quality hand tools out of titanium and other nonferrous metals that this highly specialized field demands. Imprex International provides ready-to-use tool kits and individual tools to the biggest service industry leaders all the way to the smallest outfits.

nordicBrainEX by NordicNeuroLab

nordicBrainEx is a software application for post-processing and visualization of BOLD fMRI and DTI data. nordicBrainEx addresses key issues in analyzing functional MR data within the clinical workflow. The simple and user-friendly interface improves user productivity, while the automated

protocols, processing steps, and quality control features minimize the probability of error or variability in the quality of the results. nordicBrainEx is DICOM compatible and capable of analyzing data from all major MR vendors. The reports generated with nordicBrainEx are customizable, and processed data can be saved in a variety of formats and sent in DICOM format to PACS or exported neuronavigation systems.

For more details, visit www.nordicneurolab.com, e-mail info@nordicneurolab.com, or call 262-337-0922.

making functional MRI easy

Introducing Care-Talk The Most Effective Way to Communicate in Noisy Labs, Suites, and Procedure Rooms

Physicians, cath/EP managers, interventional radiologists, and other healthcare professionals are discovering the benefits of easy, clear, effortless, and real-time communication with up to eight staff members. With Care-Talk, you no longer need to raise your voice to be heard: Every team member will hear you loud and clear without disrupting patient care. Care-Talk is affordable,

comfortable, durable, installs fast, and is already in use in major hospitals. Wireless and hard-wired versions are available.

For further information, please visit www.care-talk.com or call 614-861-8891.

ICE specializes in the repair, service, installation, and sales of cryogenic refrigeration systems for MRI magnets

- New and remanufactured parts for Leybold, Balzers, APD, Sumitomo
- Repair depot
- On-site field service
- Superconducting magnet service
- Worry-free maintenance contracts

- Factory-trained service engineers
- Servicing and repairing MRI magnets since 1985

Now available from ICE: Video borescope inspection of MRI helium vent systems as recommended by ACR for MRI safety. Protect your investment, ensure patient and staff safety. Now offering Toshiba Opert Cold Head Service.

Control-X Medical

Control-X Medical's Z-Motion Digital System with our **APEX DR Flat Panel System** is an affordable, high-quality combination of our new **Z-Motion Universal Radiographic System** with our **APEX DR FLAT Panel System** to provide extraordinary digital imagery in keeping with the proven quality of Control-X Medical's radiographic products. The versatile stand allows for easy-to-acquire exposures on standing, sitting, or reclined patients. **Quiet motorized and/or manual motion**

for all movements ensures safe and reliable stand positioning in all directions. Minimum ceiling height: 8 feet!

For more information, contact Control-X at 1755 Atlas Street, Columbus, OH 43228; by telephone at **614-777-9729**; or by e-mail at sales@cxmed.com.

New MRI Lighting Reduces Maintenance, Energy Costs

ETS-Lindgren ZXR LED Down Light & Dimmer Switch

ETS-Lindgren's Med-Vizion ZXR Down Light is a maintenance-free lighting system rated for 80,000 hours of usage. It offers simple installation with plug-and-play connections. Most importantly, compared to traditional incandescent lighting, the environmentally conscious

Med-Vizion lighting offers brighter images with reduced energy consumption, resulting in lower energy bills over time. The optional dimmer switch features a low-voltage plug-and-play interface. One dimmer switch will support up to 16 ZXR Down Light fixtures.

Nova Biomedical StatSensor® Creatinine Product Announcement

Whole Blood Creatinine and eGFR in 30 Seconds

StatSensor® Creatinine with eGFR provides a simple 30-second assessment of renal function by finger prick capillary blood sampling at the point of care. This lightweight, handheld analyzer can minimize the risk of CMIN prior to the use of contrast media and eliminate workflow interruptions that can cause lost productivity in the radiology suite. StatSensor Creatinine offers easy, virtually painless capillary blood sampling on small, 1.2-microliter blood samples with fast, 30-second test results and interfaces seamlessly with hospital and laboratory information systems. StatSensor Creatinine calculates eGFR by either MDRD or Cockcroft-Gault equations and rapidly assesses renal function for inpatient or outpatient testing.

For more details, please call **800-458-5813** or **781-647-3700**, e-mail info@novabiomedical.com, or visit www.novabiomedical.com.

Bard Biopsy Systems

Bard's Finesse™ Ultra Breast Biopsy System is the only self-contained, vacuum-assisted, ultrasound-guided breast biopsy system with the ability to acquire multiple samples with a single

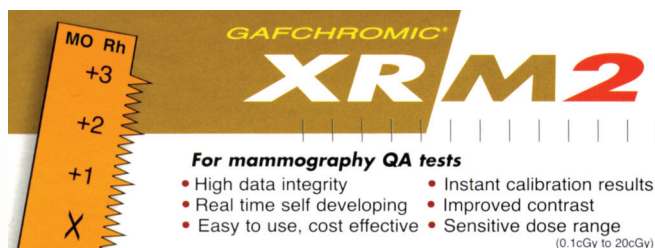

probe insertion. With a sample cycling time of just 10 seconds, the Finesse™ Ultra Breast Biopsy System rapidly acquires large, high-quality, contiguous tissue samples from a single insertion. Its ultrasharp cutting tip and optional piercing mode penetrate dense breast tissue and lesions accurately without displacing the lesion. The detachable integrated coaxial cannula maintains a track to the biopsy site to accurately place Bard's UltraClip® breast tissue marker.

Align Your Mammograph with Ease!

For mammography QA tests

- High data integrity
- Instant calibration results
- Real time self developing
- Improved contrast
- Easy to use, cost effective
- Sensitive dose range (0.1cGy to 20cGy)

GAFCHROMIC XR-M2 test strip: Self-developing, no processor or darkroom needed. Quickly align the light field, the radiation field, and the digital sensor. Accurate millimeter scale can be seen also in the monitor. Economic.

FilmQA XR software: Rapid one-click radiology dosimetry with self-developing GAFCHROMIC films. Cost-effective.

ISP: One of the oldest film manufacturers in the world, a global corporation providing world-class support and service since 1842.

For more information, please call **973-628-3283**.

Silver Prices at a 30-Year High!

Did you know a barrel of your old x-ray film is worth up to \$300 in silver?

- Why keep x-ray film for longer than your legal liability? Ask us about retention laws.
- We can purge, move, shred, recycle, or store your records. We are experts in HIPAA and HITECH compliance.
- Save thousands in monthly rent by purging off-site records. Most of the time we can cover all purge costs. Let us help lower your off-site costs.
- We are an authorized subcontractor of Kodak.
