

Product & Service **RSNA** Showcase

As a leader in unified RIS/PACS, Avreo continues to reinvent radiology workflow with its Version 7 release for preview at RSNA. Version 7 represents an extensive platform change to support key areas of growth, including:

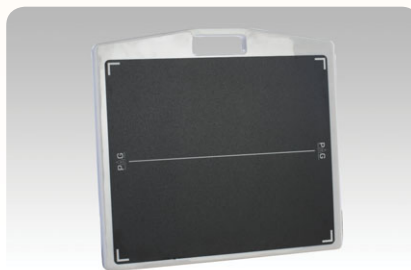

- All-new modern design with focus on workflow and usability within radiology and meaningful use.
- Cross-platform support, including Windows®, Mac OS® X, Apple® iOS, and Android™, to facilitate communication and information exchange while embracing healthcare professionals' preferred tools.
- Advanced business reporting and dashboard visualization to identify trends so your organization can respond with actionable changes.

Learn more about these and other advancements at Avreo's **RSNA booth 5423** or www.avreo.com.

Lightweight Protect-A-Grid DR Panel Encasement

In response to our customers, Reina Imaging is launching an improved Protect-A-Grid® DRP encasement that features a thinner, lighter-weight design with an easy-to-use positive lock.

Mobile DR panels are, on average, heavier than the CR and film cassettes they've replaced. After the weight of an antiscatter grid is added, it can be a burden for some technologists to position both the panel and the encasement during portable exams. RI has addressed these weight concerns by reducing the overall weight of the encasement while maintaining the structural integrity.

ApronCheck.com

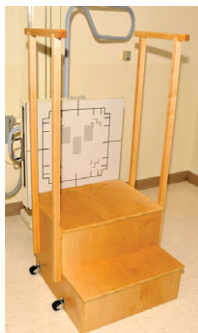

Frustrated with lead apron inspections? Worried about getting caught with your required lead apron tracking and documentation not ready for an unannounced inspection? ApronCheck.com offers a frustration-free method to accurately track mandatory lead apron inspections. ApronCheck.com provides a friendly, easy way for staff to quickly visually identify whether a lead apron has recently been inspected with the use of a colored inspection indicator on each apron.

For more information and to view an online video, please visit us at aproncheck.com and click on the "Learn More" button or call **832-365-7000**.

Introducing Medicus Health's New Radiology Two Step X-Ray Platform

Medicus Health's Radiology Two Step X-Ray Platform was designed by radiology professionals to elevate the patient for weight-bearing lower leg, ankle, and foot imaging. The Two Step Platform has a top slot designed to be used with both traditional film cassettes and new digital radiography panels to ensure high-quality images. Its sturdy casters allow simple portability

in any direction. It's constructed of 3/4" wood laminate with a durable varnish finish standard. Sturdy hand rails on each side provide support for patients. These X-ray steps are available now and ship UPS in one to two days. Overall dimensions: 24" W x 24" D x 56" H and cassette slot measures 15-1/2" L x 5/8" W. For more information, please call **877-514-1140**, e-mail us at sales@medicus-health.com, or visit our website at www.medicus-health.com.
