

# Summer Product & Service Showcase

## Biosound

Biosound's introduction of the MyLab25/30®Gold ultrasound system expands the technology of the successful MyLab®25/30, providing a new standard in premium performance ultrasound systems. This platform reflects the evolution of users' needs: high performance and reliability in a compact and portable package.

The MyLab25/30Gold is a full multi-modality, shared-services system providing analysis packages, tools, and probes for all varieties of diagnostic ultrasound. This system represents state-of-the-art technology and premium diagnostic ultrasound capabilities, ensuring extended modularity and upgradeability.

Please visit us at the 2009 SDMS Annual Conference in Nashville, Tenn., in October.

## "SureImage" Medical-Grade Electrical Power Solutions

Providing voltage regulation, isolation, and power distribution for medical imaging and treatment modalities, the **"SureImage" Model Ultra-K/M Power Conditioner** and **Model 700F/M Power Processor** enhance workflow and patient throughput and offer significant reduction/elimination of "artifacts" in digital images. Both **"SureImage"** products are "K(i) Rated" for increased surge capability and are also sized for continuous load duty to provide high efficiency and low operating costs. The front access design of each **"SureImage"** product provides easy operation, monitoring, input/output power connections, and maintenance.

## Introducing Brava™ — the Professional Alternative for Exact Localization in Breast MRI

Achieve precise localization and clear communication of specific areas of interest within Breast MRI with Brava, a new family of skin markers from Beekley Corporation.

Professional, sanitary, and more precise than taping vitamin capsules to such a sensitive area as the breast, Brava skin markers are indentation free and provide a bright, consistent image on every sequence.

Designed specifically for Breast MRI, Brava's self-adhesive label features a feminine, patient-friendly design that can help alleviate patient anxiety. Brava is available in a variety of styles and sizes. Whether your marker needs to image on 2 or 9 slices, there is a Brava skin marker for all your Breast MRI needs.

To learn more, contact Beekley at **800-233-5539**, **[www.beekley.com](http://www.beekley.com)**, or at the AHRA Annual Meeting **booths 443 and 445**.

## KUBTEC

### Improving Your Quality of Care

Where space is at a premium and efficient, high-quality patient care is the goal, the digital XPERT 20™ specimen x-ray system is the solution. KUBTEC's all new XPERT 20™ offers high-resolution images in a cabinet that takes up less space than a PC monitor. Zero warm up time, AEC (automatic exposure control), auto-calibration, automatic window leveling, and the ability to send multiple images, with annotations, to PACS ... the cost-effective answer to improving the biopsy experience for your patients. **Visit us at AHRA Booth #468.**

For further information, call **203-364-8544** or visit **www.kubtec.com**. You can also contact your local Hologic or Siemens representative for information and pricing.

## Zetta Medical Technologies

### A Better Value Without Compromise

Ask Zetta Medical Technologies' customers and they'll tell you quality means satisfaction with the preowned systems they purchase from us and that they see quality in the professional installations our experienced techs perform nationwide—**the same service engineers that provide timely, dedicated equipment maintenance for you and your team.**

Zetta customers know what quality is. They see it in our work every day—**at a fraction of the cost of the OEM.** If you're interested in seeing how we can provide quality solutions for your medical imaging needs, contact us today.

## Mirion Technologies Dosimetry Services Division

### Revolutionizing Radiation Monitoring With instadose™

Instadose™ provides an immediate dose reading when connected to any computer with Internet access. No need to collect badges to be processed, as all reads and reports are available online. Smaller than a flash drive, this rugged dosimeter is ideal for radiology centers seeking to manage their monitoring programs.

#### Additional benefits:

- Ability to reread device without loss of exposure data while maintaining cumulative exposure
- Unlimited readings for one low price
- NVLAP accredited

To learn more, visit us at **Booth #438** during AHRA or online at **www.instadose.com**.
